PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with hands-on experience in MongoDB, Express.js, React.js, and Node.js through an internship and full-stack personal projects. Skilled in building responsive web applications, RESTful APIs, and role-based dashboards, with a strong grasp of CRUD operations, API integration, Git, and Agile development. Seeking a MERN Stack Developer Internship to contribute to real-world product development.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering <i>Suguna College of Engineering, Anna University, Coimbatore CGPA: 8.1/10</i>	2023 – 2027
Higher Secondary Education (12th Grade) <i>Government Boys Higher Secondary School, Coimbatore State Board</i>	2020
Secondary Education (10th Grade) <i>St. Philomena High School, Coimbatore State Board Percentage: 65%</i>	2018

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code

Concepts: CRUD Operations, Role-Based Access Control, API Integration, MVC Architecture, MongoDB Aggregation

EXPERIENCE

MERN Stack Development Intern <i>Brainery Spot Technology, Coimbatore</i>	Dec 2025 – Jan 2026
---	---------------------

- Completed a 16-day hands-on internship covering the complete MERN stack: MongoDB, Express.js, React.js, and Node.js.
- Developed RESTful APIs using Node.js and Express.js for client-server communication.
- Built reusable React.js components and managed application state for responsive user interfaces.
- Designed MongoDB collections and database schema for CRUD operations.
- Collaborated using Git and GitHub while following Agile development practices.

PROJECTS

FoodBridge — Food Waste Management Platform <i>Personal MERN Stack Project</i>	2025 – Present
--	----------------

GitHub: github.com/Amal-vishnu04/Foodbridge

- Developed a full-stack MERN application connecting food donors, hotels, and volunteers for surplus food distribution.
- Implemented role-based access for Admin, Donor, and Volunteer dashboards with donation and pickup tracking.
- Built REST APIs for donation management, pickup requests, and expiry-based prioritization.
- Designed MongoDB schema and integrated the React.js frontend with the Express.js backend.

Technologies: React.js | Node.js | Express.js | MongoDB | Tailwind CSS | REST API | Git

Attendance Management System <i>Personal MERN Stack Project</i>	2025 – Present
---	----------------

GitHub: github.com/Amal-vishnu04/AttendanceSystem

- Built a role-based attendance system with Admin, Instructor, and Student dashboards.
- Implemented attendance tracking, leave management workflow, and a real-time analytics dashboard.
- Developed REST APIs and integrated MongoDB for secure, structured data management.
- Automated Excel report generation and designed a responsive UI using React.js and Tailwind CSS.

Technologies: React.js | Node.js | Express.js | MongoDB | REST API | Git

CERTIFICATIONS

- Full Stack Development (MERN Stack) — Coursera (MongoDB, Express.js, React.js, Node.js, REST APIs, Frontend & Backend Development)
- AWS Cloud for Innovation
- Essential SQL Skills for Data Beginners
- Introduction to Python
- Time Series Forecasting using Python

ACHIEVEMENT

- Presented a technical paper at CAMCEE 5.0 — National Level Technical Symposium, Jansons Institute of Technology.
